

Government

Oklahoma City Federal Urban Campus Oklahoma City, OK

Kroll Security Group (KSG) provided security consulting services, developed a comprehensive security program and detailed design documentation for the implementation of security systems for the new Federal Campus development in Oklahoma City to replace the Alfred F. Murrah facility destroyed in 1995. The project was conceived to accommodate the following list of government agencies.

- Department of Veteran Affairs
- DHHS, Office of the Inspector General
- DOI Bureau of Reclamation
- Equal Employment Opportunity Commission
- Food and Drug Administration
- Housing & Urban Development
- Indian Health Services
- Military Entrance Processing Center
- Small Business Administration
- US & Federal Employee Credit Unions
- US Army Recruiting Center
- US Marine Corps Recruiting Headquarters

Due to the symbolic significance of this facility, security was paramount in the minds of the government agencies to be housed in the facility and those responsible for the implementation of the project.

KSG was provided with draft GSA Security Guidelines for Federal Facilities to use as the base for any proposed security guidelines.
