

Convention Center

Hong Kong Convention Center

Hong Kong

This one million square foot expansion more than doubles the size of the existing convention center. Built totally upon new land fill in Hong Kong Harbor, it is designed as a world class facility and as an attraction to business throughout the region. Spanning a major highway, the extension is over eight levels high with a four-level atrium connecting the extension to the existing facility.

Kroll Security Group worked with the architect and contractor to provide security consulting planning, design, bid assistance and implementation management for this project.
