

Mixed-Use

San Stefano Complex

Alexandria, Egypt

Kroll Security Group provided security planning, design, engineering and installation management services for the base building and common areas in this 400,000 square meter mixed-use complex. The primary components included a 120 room Four Seasons Hotel situated between two towers of 880 residential apartments connected by a bridge, 3 levels of retail shopping, recreation areas and cinema complex and 3 levels of below grade parking.

The scope of services included security system planning and design services for each project element described above.

Security Systems included:

- Camera Surveillance and Recording
- Alarm Monitoring
- Access Control
- Intrusion Detection
- Voice Communications

San Stefano grand plaza is a mixed use development situated in the heart of one of Alexandria's most lavish neighborhoods, directly overlooking the Mediterranean coastline. It is exclusively designed to offer an extraordinary world of luxury living for its residents.
