Environmental Protection Agency

Denver, Colorado

Kroll Security Group (KSG) provided security design services and security conduit infrastructure for the new Environmental Protection Agency Region 8 Headquarters building. This structure consists of a 230,000 square foot, nine story office building with two levels of parking below grade.

KSG conducted a Security Overview of the new building. Security systems designed for the facility included:

- Access Control Systems
- Vehicular Control Systems
- Alarm Monitoring Systems
- Intrusion Detection Systems
- CCTV Surveillance & Recording Systems
- Package X-Ray Systems
- Magnetometer Systems
- Security Communications Systems

Environmental Protection Agency Region 8 works to protect human health and the environment in Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 sovereign tribal nations.
