

Historical Restoration

Kroll Security Group has extensive experience in providing security risk assessment and design and implementation services for historical facilities.

In approaching historical restoration projects, we utilize proven systems and value engineering principals to conduct a comprehensive assessment of the security program with a focus on the three basic security elements: architectural protective measures; operational guidelines; and technical security systems.

This approach ensures state-of-the-art security measures are implemented in an unobtrusive manner, while maintaining the beauty, cultural identity and significance of the facility.

Projects Include:

- Essex County Courthouse – Newark
- Federal Reserve Bank – Cleveland
- U. S. Post Office – Brooklyn
- Grand Central Station – New York
- James A Farley Building and Train Station – New York
- Kansas Statehouse – Topeka
- New York City Housing Authority Central Office – New York
- Ohio Departments Building – Columbus
- Ohio Statehouse – Columbus
- Penn Station – New York
- Philadelphia City Hall – Philadelphia
- South Station – Boston
- Texas Governor’s Mansion – Austin
- Texas State Capitol – Austin
- Texas Statehouse – Austin
